

## PM NEWS

### ENVIRONMENTAL FRIENDLINESS AND GROWING ENVIRONMENTAL SUSTAINABILITY

PM S.P.A. IS CLOSELY FOCUSED ON THE ENVIRONMENT AND ON NEW ENGINEERING SOLUTIONS ABLE TO PERMIT AN ECO-SUSTAINABLE PRODUCTION IMPACT.

In 2008, the company already began investing in photovoltaic systems to be installed on the roofs of its facilities and, in 2009, the first of the two planned systems was completed.

In late 2010, the company facilities equipped with photovoltaic systems produced a power of 340.00 kWp, all of which used for the company's internal requirements.

Such Green Energy amounts to 1/3 of the company's energy needs, puts PM S.p.A. in harmony with the environment and goes to show how care and attention for the environment can sustain the healthy growth and development of a company, that operates in a sector with strongly technological industrial characteristics. Thanks to the spirit with which PM S.p.A. carries on its business, the company has managed to soften the environmental impact of the production

activities of its facilities thanks to innovative technology whereby Green-Efficiency & Eco-Sustainability have been achieved.

The company also employs manufacturing processes which are constantly monitored so as to produce the least possible environmental impact.
